

# CS 440 Meeting Minutes

Group 9 Date: September 27, 2023 Time: 12:00 Duration: 60 minutes

Present, on time: Nicholas Tryba, Marcos Echevarria, Christian Garcia

Present, not on time:

Absent: Jose Cuellar-Aguirre

---

## Synopsis:

-We continued discussion on implementing new scenes to the game. Specifically how we would enable viewing planets and seeing planet statistics. Nick drew a proposed idea on adding 3 different scenes that would open when the user interacts with specific buttons in the exploration scene. In terms of the development project, Marcos took the initiative and completed the first two sections of the description report. Scene implementation is taking initiative as we round up the first sprint. We also discussed that we need to catch up on populating Jira.

## Recent Accomplishments:

Marcos completed his required sections on the description report for the development project, he also began adding into the product backlog on Jira. Christian also spent a very long time making a custom context diagram for the development project report, all with custom images and the logo for what the app might be like. Nick also finished the rest of the slides for the presentation, still maintaining the weekly minutes.

**Current Activities:** Continue working on implementing different galaxy scenes, each of us will need to implement scene swaps concerning the different planets that can be viewed. Each of us will need to complete sections of the project description report as well. Marcos was tasked with sections 1-2, and the summary. Christian is tasked with section 3 and 8. Nick is tasked with 4-5. Jose is tasked with 6-7. We are presenting on Friday, so Nick, Marcos, and Christian must rehearse the slides they prepared. Jose did not prepare any slides so he will not be participating vocally during the presentation. As a whole everyone must fill the product backlog on Jira.

## Action Items:

Nick: Weekly Minutes, Rehearse Presentation slides (Scope of Product – Stake Holders), fill Jira backlog, implement exploration mode scene, Project Description Sections 4-5

Marcos: Rehearse Presentation Slides (Introduction, project overview, project purpose), fill Jira backlog, implement exploration scene, Project Description Sections 1-2/Summary

Christian: Rehearse Presentation Slides (Scope of Work), fill Jira backlog, implement exploration scene, Project Description Sections 3 and 8

Jose: fill Jira backlog, implement exploration scene, Project Description Sections 6-7
