CS 440 Meeting Minutes

Group 9 Date: September 20, 2023 Time: 12:00 Duration: 60 minutes

Present, on time: Nicholas Tryba, Marcos Echevarria, Christian Garcia

Present, not on time: None

Absent: Jose Cuellar-Aguirre (bus accident, notified professor)

Synopsis:

-We discussed the different features we have implemented so far during our sprint of week 1. Marcos completed a GUI that will serve as a template for creating different scenes in the exploration mode. Some discussion was centered around the format of the scene, Nick specifically raised questions on how the player inventory was displayed and there may be some changes down the line since this is simply a prototype as player inventory shouldn't be implemented until the third and final sprint. We also began a much more deeper discussion on our development project, specifically on how to tackle the upcoming presentation.

Recent Accomplishments:

Marcos completed a template GUI to hold the exploration mode scenes. Nick completed a startup GUI that will serve as the entry scene into the game, allowing users to choose between the different modes. Christian has continued his work on a player class to hold the data, this will be finalized when we have a more concrete idea of how the inventory will be used. Buttons on the startup GUI were implemented by Nick, allowing for a user to exit, but switching scenes has yet to be implemented.

Current Activities: Scenario 1 coding continues, this week we will work more on implementing different scenes within the exploration mode, including backgrounds and buttons to swap between galaxies. Marcos is tasked with conveying the starting galaxy (Milky Way Galaxy), while Nick and Christian are choosing two neighboring galaxies to implement their scenes. Jose has been updated to do the same thing but in his current condition it is unknown what can be done. Everyone is working on adding material to the presentation slide deck for Monday(9/25/23).

Action Items:

Nick: Weekly Minutes, Exploration Mode Scene Implementation (undetermined galaxy), Presentation Slides

Marcos: Exploration Mode Scene Implementation (Milky Way Galaxy), Presentation Slides

Christian: Exploration Mode Scene Implementation (undetermined galaxy), Presentation Slides

Jose: Presentation Slides
